

## TDR "SILENCER" WATERBOX

The "Silencer" waterbox is made of all aluminum construction and marine grade corrosion resistant alloys. These waterboxes can be installed in the original position and utilize the original straps. TDR "Silencer" waterboxes deliver the most horsepower gain for your money. These high quality waterboxes are constructed with heavy duty material for longevity and dependability. Installation of a TDR waterbox may require jetting and/or impeller changes due to the increase in exhaust flow and horsepower. All TDR waterboxes come in a bright aluminum finish and are available in 2 different styles. **PRICE \$210**

## BAFFLED STYLE WATERBOX

This waterbox is designed for the recreational rider who wants a power increase with a deep throaty sound. Although the baffle type waterbox is louder than the stock "OEM" waterbox, it is not offensively loud and it is the easiest to install. These waterboxes work well on stock, slightly modified, and recreational motors. To order, place the letter "B" after the appropriate part#. Example: #02-0013-B Yamaha Waverunner III.

## POWER SPRAY STYLE WATERBOX

This waterbox is designed for the racer or high performance enthusiast. The TDR "power spray" waterbox is completely hollow and has no restrictive baffles, allowing maximum exhaust flow. The "power spray" silences the exhaust noise by inducing a series of ultra-fine sprays of water mist. This mist of water applied in the proper places quiets the exhaust noise with any restrictions or power loss. WARNING-this waterbox is extremely loud and could result in fines for excessive noise. To order, place the letters "PS" after the appropriate part number. Example: 02-0058-PS Kaw Ultra 150.

## Four Stroke Waterboxes

All four stroke waterboxes have no internal baffles and are free flowing.
